New 3-D Bubble Propylene Inkjet Media

When you print on this material, it allows images to have the appearance of "popping out" of the media. It creates a 3-D effect that is similar, yet different to the 3-D look of lenticular images, and can be utilized without costly software or fancy art setups. The media is compatible with *any* aqueous, latex, or solvent inkjet printer.

It brings a whole new set of possibilities to the inkjet printing world. Use it to create:

- One-of-a-kind seasonal signage / backlits
- Unique, eye-popping POS / POP displays
- Slap-you-in-the-face presentations
- Attention-grabbing retail packaging
- Can be trimmed, cut, glued, or bound

If you want a cool 3-D printed sample, just let us know and we will send you one to you.

New Epson S-Series Solvent Printers

The all-new Epson SureColor 64"-wide S30670 delivers unmatched performance and value. This "green" state-of-the-art printer is capable of producing *excellent image quality* at high print speeds. It utilizes the latest imaging technology plus Epson's new, most advanced solvent-based inks – Epson UltraChrome® GS2 which are odorless, *nickel-free* and require no special ventilation. There are no other inks like these out there.

The 64"-wide S30 is currently shipping now. We have a S30 printer set up for demonstration here at JVH, so if you would like to see the printer *in action* and discuss what it can do to *grow your business*, just give us a call and stop by any time.

Additional S-Series models will be available in the Fall. We will have complete specs on those models when Epson releases the information on its website. There will be quite a demand for these new printers. They can give you even more capability and competitive advantage in the indoor and *outdoor* marketplace. That being said, we are already impressed with the speed and image quality of the basic 4-color S30670.

We are loosely penciling in people for the new printers, with no \$\$ deposit required. Please let us know if you are interested in getting on the *preorder list*.

New Price on the Epson GS6000

A best buy at **\$14,995**. effective July 1.
