March, 2012

## Workshop and Digital Festival - next week!

You still have a week left to RSVP. The Workshop is **Tues, March 20, 2012**. This educational event will enhance your **technical** knowledge and help your business grow, using large-format printers.

The Festival is **Weds, March 21**. This educational event is **free** and fun. RSVP at tel 425.643.7323, email, or register on-line. Info at <http://jvhtech.com/festival.php>

At the Festival, we will also be holding the 8th Annual **Digital Print Contest**. This enjoyable event shows off many of our customers' impressive work.

## New Epson S30670 64" Solvent Printer

Epson has done it again. This new technology Epson SureColor S30670 "green" printer has the latest state-of-the-art features, yet is priced at just **\$16,995**. Capable of producing **astounding print quality** at high print speeds up to **620 sqft/hr** the printer utilizes Epson's most advanced imaging technology. It includes the exotic TFP print head and Epson's new, most advanced solvent-based inks – Epson UltraChrome® G52 which are odorless, **nickel-free** and require no special ventilation. There are no other inks like these on the market.

The all-new Epson SureColor S30670 redefines the price performance equation, delivering unmatched performance and value. This is the way solvent printing should be.

The printer will be shipping this month. Contact JYH for details, plus check out all the specs at:

## Epson GS DisplayTrans Backlight Film

Epson has announced the next offering in its expanding lineup of media for the GS 6000 and S30670 solvent ink printers. Designed for creating stunning backlit signage to be used in a lightbox for advertisements or displays, this opaque polyester film provides for **deep, rich blacks** and incredibly **vivid colors**. When laminated, the film can also be displayed as a daylight reflective image. All sizes of this media are in stock and available in 30", 50" and 60" x 100' rolls. Call for samples and information.

## EPSON Exhibition Canvas Printing/Finishing

Due to the popularity of the new Signature Worthy® line of Exhibition Canvas, Epson has received many requests on how to properly print, top coat, gallery wrap, and display a finished canvas inkjet print. Unlike traditional photographic prints, canvas fine art requires certain techniques that differentiate this medium and add to the beauty of the finished product.

Attached is a PDF that addresses those topics. Also, within the document is an active link to an Epson-produced video that acts as a "How To" on canvas gallery wrapping techniques and display. This video and accompanying PDF document should serve as an excellent reference for you.

## March 2012 Printer and Media Rebates

Buy three qualifying packs of  
**Epson Signature Worthy Media**  
and get a rebate for the cost of one  
mail-in rebate - Mar 1 to Mar 31 (valid for up to 10 coupons)
